

MONT SYSTEM

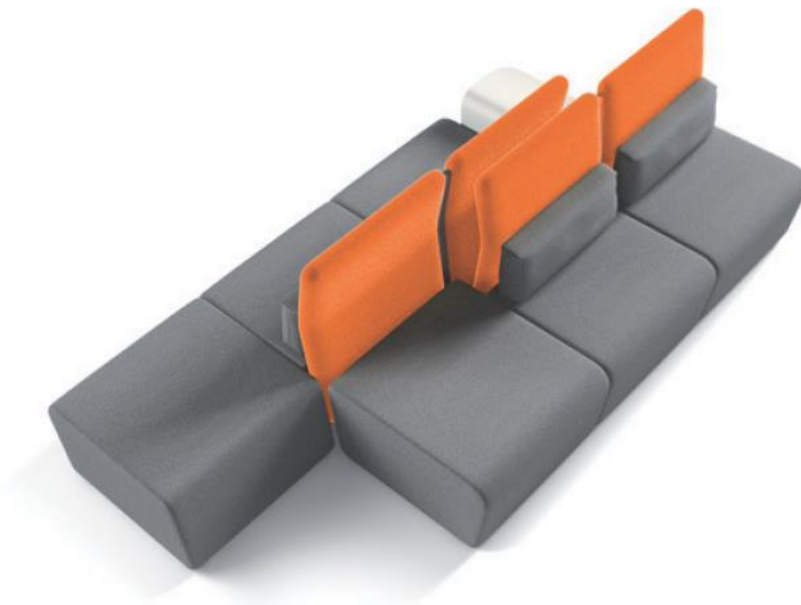

modular elements, sofas, seats

Product description:

MONT is a system of chairs and sofas, which provides you with a nice retreat from the usual office buzz. Great ideas and common goals tend to be born at the summit. Doesn't matter if it's a longer meeting, a brief conversation, or a short chat – all these can pave the way for success. But sometimes all we need is some time-out to clear our mind, and a moment to take a break. MONT's partially-enclosed seats and partition walls are there to let you create some personal space to relax, wait, or talk in a smaller or larger group to discuss a shared vision.

MONT is a seating system featuring fully-upholstered walls and offering a broad range of arrangement options. It comes also with an upholstered cushion that provides lumbar support. There is an additional possibility to use a side-fixed table of plywood in white or graphite HPL laminate. The seat is upholstered, made of PU foam, and base on a box-type frame with slides. The backrest is upholstered, filled with PU foam, and fixed permanently to the seat.
